To give effective as well as efficient efforts towards the attainment of organizational goals with exploring the wide scope of knowledge and intelligence. To work in an environment that provides a challenging and rewarding career ensuring high- level job satisfaction. In the process apart from benefiting my employer, I also expect to learn for my overall development in playwright automation.

PROFESSIONAL PROFILE

- Result-oriented QA Automation Engineer with 5.5+ years of experience in functional, API, and UI automation testing. Specialized in Cypress, Playwright, and Selenium, with strong experience in automation frameworks (BDD, POM, Data-Driven), API testing, and test integration into DevOps pipelines. Proven track record in delivering quality products across Banking, Healthcare, and e-Commerce domains through high-level test strategy, deep debugging skills, and strong collaboration with Agile teams.
- Good experience in Page Object Model and Object-Oriented Programming Structure (OOPS) Concepts. Utilized Git for version control, managing and organizing code repositories efficiently.
- Skilled in preparing Test Cases, Test Scripts, and Test Data, proficiently analyzing Test results, and generating detailed defect reports.
- Possess explicit knowledge of the Software Development Life Cycle (SDLC) and the Software Testing Life Cycle (STLC).
- Experience in frameworks such as Cucumber BDD, JUnit, TestNG TDD, and Data-Driven framework.
- Familiarity with dependency management tools like Maven and continuous integration with Jenkins.
- Proficient in developing, executing, and maintaining automation scripts using Selenium WebDriver and JavaScript.
- Successfully executed automation scripts across various browsers and environments, promptly reporting defects and results to the team.
- Proficient in using JIRA for bug reporting and collaborated closely with developers and managers to resolve technical issues during automation testing.
- Excelled in various testing types including Functional, Regression, GUI, Black Box, Smoke, and System Testing.
- Expertise in AWS Cloud: EC2, Auto Scaling, CloudWatch, Security Groups.
- Created and managed Continuous Integration and Continuous Delivery (CI/CD).
- Installed, configured, and maintained Jenkins for CI and end-to-end build and deployment automation. Managed GitHub repositories, including permissions, branching, and tagging.
- Developed Docker images to build and run Docker containers.

TECHNICAL SKILLS

- Languages: JavaScript, Core Java, SQL, MySQL
- Automation: Playwright, Cypress, Selenium WebDriver
- Frameworks: BDD (Cucumber), POM, Data-Driven, Hybrid
- API Testing: Postman, Cypress, Rest Assured
- Build Tools: Maven, NPM
- CI/CD: Jenkins, Git
- Test Management: JIRA, TestRail, Xray
- OS/Browser Testing: Windows, Linux, Chrome, Firefox, Edge
- Methodologies: Agile Scrum, Sprint Planning, Daily Stand-ups, Retrospective
- Others: HTML, CSS, GitHub, TestNG, JUnit, Excel (Apache POI), JSON/XML Parsing

PROFESSIONAL EXPERIENCE

AMTEX SYSTEMS INC

SENIOR EXECUTIVE

FEB 2025 – PRESENT

Project: BAXTER (Healthcare Domain) – Cypress Automation

Responsibilities:

- Built a Cypress automation framework using JavaScript with well-organized segregation of specs, fixtures, plugins, and reusable commands.
- Automated end-to-end healthcare workflows such as patient enrollment, claims processing, medical device data sync, and billing cycles.
- Developed custom Cypress commands for UI validations, API interactions, and network stubbing using cy.intercept.
- Verified HL7/FHIR-compliant APIs with JSON schema validations within Cypress test flows.
- Utilized cy.task for backend data verification and database assertions using MySQL.
- Handled conditional test flows using route-level assertions for asynchronous data synchronization.
- Implemented test retries, tagging (smoke/regression), and a cross-browser execution matrix through Cypress Dashboard.
- Integrated test execution pipelines with GitHub Actions and Jenkins for scheduled smoke and regression runs.
- Authenticated test scenarios using JWT and OAuth2 tokens to access PHI-secured modules.
- Documented test cases and captured execution evidence (videos/screenshots) using TestRail.
- Collaborated with business analysts to refine test coverage based on real-world clinical use cases and acceptance criteria.

TELEPERFORMANCE

SEP 2023–DEC 2024

SENIOR ASSOCIATE

Project: GOLDMAN SACHS (Banking Domain) – Playwright Automation

Responsibilities:

- Built a scalable and reusable Playwright test automation framework using JavaScript, with modular test utilities and centralized selectors.
 - Automated key banking features including funds transfer, account verification, credit score integration, and loan processing.
 - Developed custom Playwright wrappers for element handling and reusable page actions, adhering to the Page Object Model (POM) structure.
 - Simulated multi-tab and multi-user sessions for transaction authorization and validation.
 - Integrated test suites with Jenkins pipelines and configured nightly test executions across multiple environments (Dev/UAT/Stage).
 - Utilized Playwright's APIRequestContext for REST API testing of loan APIs, account balance checks, and fraud detection modules.
 - Generated dynamic test data using Faker to create realistic account creation and credit approval scenarios.
 - Analyzed execution logs using browser tracing and Playwright Trace Viewer to debug flaky and intermittent test failures.
 - Actively participated in daily scrums and contributed to detailed defect triage through JIRA dashboards.
 - Supported end-to-end regression testing and post-production sanity validations.
 - Mentored new joiners on Playwright test execution, framework design, and best practices.
-

Project: SUPERDRY (e-Commerce Domain) – Manual & Selenium Testing

Responsibilities:

- Crafted and executed manual test cases focusing on UI validation, cart functionalities, product listings, and payment gateway processes.
- Developed automated regression and smoke testing scripts using Selenium with Java and TestNG.
- Established a Page Object Model (POM)-based framework structure utilizing Maven, WebDriverManager, and reusable utility classes to handle dynamic locators.
- Employed Apache POI to read various product input values from Excel in data-driven test suites.
- Configured Selenium Grid for parallel execution across Chrome and Firefox browsers.
- Conducted cross-browser and responsive testing for mobile and tablet breakpoints.
- Utilized Postman to validate REST APIs related to product search, order confirmation, and shipping modules.
- Created detailed test plans, managed test cycles in JIRA, and monitored defect resolution timelines.
- Collaborated with UI/UX teams to ensure accuracy in color codes, fonts, and pixel-perfect alignment using browser developer tools.
- Delivered stakeholder demos post-release and performed production sanity validations.

EDUCATION:

BACHELOR OF COMPUTER SCIENCE –

BS .ABDUR RAHMAN CRESCENT INSTITUTE OF SCIENCE AND TECHNOLOGY – CHENNAI
